PROFILE

Recent computer science graduate, currently pursuing a Master 2 in MBDS, I am looking for new opportunities to develop my skills and grow in the field. Curious and self-driven, I enjoy learning and making a concrete contribution to the projects I am entrusted with.

TECHNICAL SKILLS

Languages: Java, PHP, Python, JavaScript, C, C#

Backend: Spring Boot, Node.js, Symfony, .NET, Odoo

Frontend: React, Angular, React Native, Bootstrap

Databases: PostgreSQL, MySQL, Oracle, MongoDB

Tools: GitLab / GitHub, Docker, Firebase, Photoshop

PROFESSIONAL EXPERIENCE

Fullstack Developer — GeoMadagascar

April 2026 — Present · Internship

Antananarivo, Madagascar

Symfony · PHP · PostgreSQL

- Full redesign of the GeoMadagascar website.
- Creation of the ConsoMyZone application homepage.
- Modernisation of several application interfaces.
- Development of new features for the ConsoMyZone application.

Odoo Developer — Assurances ARO

September 2025 — November 2025 · Internship

Antananarivo, Madagascar

Odoo 8 · Python · XML · PostgreSQL

- Replaced Odoo 8's native budget module, which did not meet the host company's needs, with a custom end-to-end solution.
- Implemented real-time expense tracking with comparative analysis dashboards.
- Set up automated email notifications triggered by budget threshold events.
- Wrote technical and functional documentation for team handover.

EDUCATION

Master 2 — MBDS

November 2026 — Present

IT University, Andoharanofotsy — Mobiquity, Databases and Systems Integration (partnership with Université Côte d'Azur)

Master's Year 1 — Computer Science

January 2026 — October 2026

IT University, Andoharanofotsy — Common core

Bachelor's Degree — Computer Science (Development)

September 2022 — December 2025

IT University, Andoharanofotsy, Madagascar

High School Diploma — Science (Baccalauréat D)

2010 — 2022

Collège Saint Michel, Amparibe, Madagascar

KEY PROJECTS

Shopping Centre App

Academic project

Node.js · Express · Angular · MongoDB

- **Problem:** an Akoor-style shopping centre needed one shared tool for admins, merchants and clients — without juggling separate systems.
- **Result:** multi-role app — admin (users, shops, events), merchants (store, promotions) and clients (listings, reviews, favourites).

Budget Management Module (Odoo)

Degree project

Odoo · Python · XML · PostgreSQL

- **Problem:** Odoo 8's built-in budget management module did not meet the host company's needs.
- **Result:** custom module — budget planning, expense tracking, comparative analysis, dashboard and automated notifications.

AI Study Assistant

Personal project

Next.js · TypeScript · Prisma · SQLite · Tailwind CSS · JWT · RAG

- **Problem:** long PDFs are hard to study: you waste time rereading, summarising, and checking what stuck.
- **Result:** platform that turns PDFs into AI study tools — summary, sourced RAG chat, quizzes, flashcards and progress tracking.

AsaFinder

Personal project

Next.js · TypeScript · React · Tailwind CSS

- **Problem:** job offers are scattered across multiple platforms, which makes searching difficult.
- **Result:** one search to find matching offers — without juggling between sites.

ERP Application — Procurement & HR

Academic project

Java · Spring Boot · Python · ERPNext · HTML · CSS · JavaScript

- Supplier quote requests, invoice tracking and advanced HR list filters.
- Payroll generation and PDF export; annual salary analytics.
- Synchronisation with ERPNext Procurement and HR modules.

Lightweight Web Framework

Personal project

Java

- Centralised controller, URL routing and standardised HTTP response handling.
- Server-side form validation and role-based access control.

LANGUAGES

Malagasy	Native
French	Fluent (written and spoken)
English	Intermediate

SOFT SKILLS

Teamwork and communication
Adaptability
Curiosity and fast learner
Rigor and autonomy
